Learning objectives/outcomes (for breakouts and pre-conferences) set the direction of the session and keep the presentation or training focused. To help bring the content to life and make it actionable, please clearly define how your session will support attendees in implementing and applying their learnings back at the office. Put the emphasis on participants acquiring skills, rather than simply receiving knowledge. For help writing objectives/takeaways try combining a skill that participants need to know how to do then what they need to know in order to do that. For example, you can complete the stem “Upon completion of this course, participants will be able to....” See link for “Guidelines for writing learning objectives and content” on the welcome screen.
