

INACSL STATEMENT OF WORK

Individuals claiming authorship should meet all 4 of the following conditions:

- Authors make substantial contributions to conception and design, and/or acquisition of data, and/or analysis and interpretation of data;
- Authors participate in drafting the article or revising it critically for important intellectual content; and
- Authors give final approval of the version to be submitted and any revised version.
- Authors agree to be accountable for all aspects of the work.

Each author should have participated sufficiently in the work to take public responsibility for appropriate portions of the content. Allowing one's name to appear as an author without having contributed significantly to the study or adding the name of an individual who has not contributed or who has not agreed to the work in its current form is considered a breach of appropriate authorship.

Ghost-writing is NOT acceptable. No one, other than the authors listed below, should have contributed substantially to the writing and revising of the manuscript. Contributors who do not meet the criteria for authorship should not be listed. Examples include: individuals who allowed their clinical experience to be included, a person who provided purely technical help, copyediting, proofreading or translation assistance (NO ghostwriters allowed), or a department Chair who provided only general support. Groups of persons who have contributed materially to the paper, but whose contributions do not justify authorship should not be listed as authors.

The presenting author(s) must be a registered conference attendee for subject matter to be published and presented. Once the abstract has been submitted and locked, authorship cannot be adjusted.
