- Bedside US in UC?

Pediatrics

- **Orthopedic Potpourri:** subtleties of pediatric orthopedics and sports medicine yet presenting complaints you don't want to miss. This would be a surface skate look at tendon injuries in the hand (gamekeepers or skiers' thumb and jersey finger), nursemaids (FOOSH and hyper-pronation), Severs, Perthes, Supracondylar Type I, Osgood Schlatter, and musculoskeletal infection in a limping child.
- **Derm Potpourri:** a case-based presentation on a wide-array of derm issues.
- **Infectious Disease Pearls:** broad-based topic session covering Kawasaki's, Tick Fever (Lyme, RMSF, Ehrlichiosis and STARI), UTI vs pyelonephritis, latest treatment recommendations for pneumonia, rhinosinusitis in children, and some otitis media pearls
- **Pharyngitis – When It Isn't Strep Throat:** covers both some pearls related to strep throat diagnosis and treatment along with recognizing a peritonsillar abscess, retropharyngeal abscess, EBV, adenovirus, and possible re-emergency of diphtheria in this day of anti-vaccination patients
- **Abdominal Pain in Children – When is Isn't Functional Constipation –** a deep dive covering intussusception, appendicitis, mid-gut volvulus, torsed ovary, etc.
- **Travel Medicine and Implications in an Urgent Care Setting**
- **Migraine headache in children** would be a good topic for more of a deep dive
