

## Breakout Themes

This year the Summit organizers will be looking for submissions that will fall in to one of the themes outlined below. Tracks and themes are subject to change based on the quality of submissions.

- **Innovative Pathways and Solutions**—Hear from experts about advancements in technologies, sharing best practices and outlining unique strategies to arrive at sustainable solutions across the food and agriculture value chain. Showcase innovative pathways and solutions to advancing sustainable agriculture at scale.
- **Key Drivers in Advancing and Defining Sustainability**—Learn more about how consumer choices, investor pressures, and advocacy efforts effect agricultural sustainability and how to strengthen confidence and demonstrate impact to key constituencies.
- **Resiliency and the Future of Food**—Explore solutions to increase the resiliency of agriculture in the face of more volatile weather and an ever-changing climate. Identify strategies to meet rising demand for food, feed, fiber and fuel, while conserving our natural resource base.
- **Economic Profitability and Feasibility**—Define the challenges faced by the value chain in reconciling sustainability with profitability and identify strategies to overcome these roadblocks. Examine how the market potential for purpose-driven brands can create shared value for all links in the chain
- **A World Well Nourished** -Examine the economic, social and technological solutions that are happening across agriculture to meet the increasingly urgent consumer demand for sustainable nutrition options—food that is not only good for them but good for the planet. How do value chains share a common vision for a healthy and sustainable food system?
