

# 16th International Detonation Symposium

## Submission Guidelines for Extended Abstracts

The following information will be collected via the online submission form:

- Abstract title.
- Selection of preferred presentation format.
- Full name (including prefix), organization, city, state, phone, and email address for all authors  
**NOTE:** after adding any co-authors, you have the option of inviting them to complete their own profile. Instructions are provided within the Authors section.
- Confirmation that your technical submission has received appropriate approval for public release from your organization or sponsor.
- Select one of six primary topical areas as your first choice topic. May also select a second choice from the same list of six primary topical areas.
- Brief summary of your abstract (2 to 3 sentences, minimum 10 words, maximum 75 words). Will be seen by reviewers and, if your abstract is accepted, will assist organizers in proper categorization and placement within the 16<sup>th</sup> IDS program. Additionally, may be used in the 16th IDS Program listing for your presentation. *NOTE: This is NOT your abstract.*
- Extended abstract (see guidelines below).
- Anticipated need, if any, for unusual audio-visual equipment other than the standard equipment provided.
- Permission for future email communication about the International Detonation Symposium.

**Extended abstracts will be submitted as a file upload.**

- **Length:** One to two pages
- **Graphics:** Include any pertinent figures or tables up to a maximum of two
- **File format:** MS Word or PDF

**Remember:**

- Abstracts will be competitively evaluated for their application to the science of explosives and detonation.
- Studies directly related to specific weapons systems are **NOT** appropriate for this symposium.
