

# ***EMF Research Fellowship Grant***

*Please read these instructions carefully. Applications that do not follow these instructions with regards to typesize, length, format, and supporting documentation will be summarily rejected. If the grant application deadline has not passed, the application may be resubmitted after deficiencies are addressed. No extension of the deadline will be granted to allow resubmission in this cycle.*

**Before submitting your application, please be sure that the following items have been addressed:**

- Information page is included as the first page of the application packet and is fully completed.
- Type size is no smaller than 15 characters per inch (use 12-pt. font if you are unsure)
- Evidence of IRB/AUC approval, or at least evidence of submission to IRB/AUC, from each institution, is included in application packet (for multi-centered studies, approval from or evidence of submission to IRB/AUC for all sites is required)
- Clearly stated educational goals for the fellowship
- Clearly stated research hypothesis
- Signed Statement of Conditions is included in application packet.
- Letter of support from mentor is included in application packet
- Letter of support from Emergency Medicine Chair is included in application packet
- Letter of support from each co-investigator is included in application packet
- **Other grant support for the proposed project is included in application packet**
- Submission via our on-line application system is required. Late applications will not be considered.  
<http://www.emfoundation.org/applyforagrant/>

# EMERGENCY MEDICINE FOUNDATION RESEARCH FELLOWSHIP GRANT

## GENERAL INFORMATION

2016-2017

Deadline for receipt of application - February 12, 2016  
Notification of award - May 2016  
Funding - July 1, 2016 - June 30, 2018

Please fill out the information questionnaire and upload the completed application through our online grant portal at <http://www.emfoundation.org/applyforagrant/>

## GRANT TOPIC

The Emergency Medicine Foundation awards funds for fellowship stipends to support the development of research expertise in emergency medicine. The goals of the EMF Research Fellowship Program are 1) to promote research within the specialty of emergency medicine, 2) to advance emergency medical care, and 3) to facilitate the academic growth, advanced education, and development of future researchers in emergency medicine and thereby invest in the future of the specialty of emergency medicine.

EMF Research Fellow stipends are available to non-profit institutions that possess the facilities for clinical or basic science research and have on their staff the necessary experienced investigators and educators to promote the academic growth of the research fellow. The Research Fellowship Grant Program awards up to \$150,000 over two years. Awards are made with the stipulation that they are to be **used only as salary and tuition support** for the EMF Research Fellow.

## DEFINITION OF EMERGENCY MEDICINE RESEARCH

Emergency medicine research is broadly defined as scientific investigation designed to furnish new knowledge relating to emergency medical care. Such investigations may focus on basic science research, clinical research, preventive medicine, epidemiology, health care policy, or emergency medicine teaching and education.

## PURPOSE OF THE FELLOWSHIP

The EMF Research Fellowship is intended to provide the opportunity for formal education in research methodologies, and experience in research in preparation for an academic career as a research scientist. Fellowship proposals pursuing additional degrees (MS, PhD, etc) will receive the highest priority. The fellow should work in an active, progressive research environment that intimately involves the fellow in the conception, planning, conduct, and reporting of emergency medicine research. It is expected that the fellow will receive formal education in such topics as biomedical statistics, research design, laboratory safety, grant writing, and regulatory and ethical concerns. At the end of the Fellowship, the fellow should have a firm foundation in the fundamentals that will prepare the fellow to conduct independent research and compete effectively for extramural funding.

## FUNDING PRIORITIES

For this grant cycle, EMF encourages applications with a focus on health services research, including but not limited to, health policy, practice, medical liability, regionalization, patient safety, and hospital utilization. However, it is important to note that EMF welcomes all applications, including research that is not health services-based,

## QUALIFICATIONS OF THE FELLOW

The designated research fellow must be a **graduate of an ACGME approved emergency medicine residency training program at the beginning of the proposed funding period**. The recipient institution must provide the name of the fellow, curriculum vitae and any other pertinent information to EMF prior to start of

funding and approval of the fellow is subject to final review by EMF. Strong priority will be given to applicants participating in a degree bearing (MS, PhD, etc) training program during the fellowship.

## **QUALIFICATIONS AND RESPONSIBILITIES OF THE MENTOR**

It is required that the applicant submit a letter of support from a Mentor at the applicant's institution. This letter must describe the Mentor's role and responsibilities. The Mentor must hold a MD, DO, PhD or equivalent degree. The Mentor must have proven ability to pursue independent research as evidenced by original research publications in peer-reviewed journals and/or funding from extramural sources. The Mentor may be in any department within the applicant's institution.

## **EVALUATION OF APPLICATIONS**

Each application will be reviewed by emergency medicine specialists who are involved/informed in basic and clinical emergency medicine research. Each application will be judged primarily by the likelihood of producing dedicated, qualified researchers in emergency medicine as indicated by 1) the strength of the fellowship educational curriculum (and pursuit of additional degrees; MS, PhD, etc), 2) the qualifications of the Mentor, 3) the scientific merit of the research projects, 4) the adequacy of funding, and 5) the willingness of the Mentor's institution to train researchers in emergency medicine and provide the necessary facilities and support to complete the curriculum and projects as described. The final funding decision will be made by the Emergency Medicine Foundation Board of Trustees, and all decisions are final.

## **TERMS OF THE GRANT**

### Duration and Grant Amount

Applicants may apply for up to a total of \$150,000 for a two year period.

### Extension of Grant Period

In unusual circumstances, arrangements can be made for an extension of an award. Such a request must be made by the Mentor at least 60 days before the expiration date of the award. This request must be made in writing, specify reasons for requesting the extension, and state a new expiration date. Project extensions of greater than six months will not be considered.

### Change of Status of Designated Mentor or Research Fellow

If the named Mentor or research fellow changes affiliations or ceases research in the field for which the fellowship stipend was made, the award will terminate and the remaining balance will be returned to the Emergency Medicine Foundation.

### Location of work

Stipends are awarded for investigations in the United States at an accredited medical school, medical center, or institution affiliated with a university teaching program. The Mentor will make all arrangements for conduct of the proposed research projects.

### Financial Support

Foundation funds will be used only to provide salary or tuition support for the named EMF Research Fellow. Semi-annual payments will be made to the Mentor's institution that will be responsible for administering the funds. The Emergency Medicine Foundation will not be responsible for institutional overhead. The Mentor and the Mentor's department will be responsible for incurred institutional overhead. Detailed audited financial reports may be required.

### Liability of the Emergency Medicine Foundation

The EMF assumes no financial liability if patient care responsibilities of any kind are undertaken by the EMF Research Fellow or Mentor. The Mentor and the Mentor's institution acknowledge that the EMF is not legally liable for the conduct of the EMF Research Fellow or the Mentor and associate investigators.

## Patent Policy

The Mentor and Mentor's institution acknowledge that if a patentable invention or discovery is conceived, or conceived and reduced to practice by the EMF Research Fellow during the term of the fellowship, the EMF must be apprised of the invention and the institution's plans for protecting such invention under existing institutional patent policy. The EMF will defer to institutional policies where they are in compliance with those of the Federal government. The EMF reserves the right where the institution has no patent policy, or policies not in compliance with those of the federal government, to claim rights and interests in the invention or discovery.

## Limitations on Grants

Awards are made with the stipulation they are to be used **only as salary (and benefit) and tuition support** for the named EMF Research Fellow. Cost for project completion, publications, travel, secretarial support, etc., must be borne by the program/institution and the funding sources identified.

## **SUPPORT FACILITIES**

The Mentor must submit letters of support if the proposed project uses facilities not routinely available to or directly under the supervision of the sponsoring program.

## **PUBLICATIONS**

All discoveries resulting from work supported in part by the Emergency Medicine Foundation should be made available to the public and scientific community through approved scientific channels such as national meetings and peer reviewed publications. Publications will acknowledge the support of the Emergency Medicine Foundation and the appropriate corporate underwriter, if any. Two reprints of each publication should be forwarded to the Emergency Medicine Foundation.

## **PROGRESS REPORTS AND MONEY MANAGEMENT**

The Mentor and designated EMF Research Fellow are required to submit a three progress reports and a final report. Additional reports may be required. Failure to provide such reports will delay transmission of funds. Furthermore, failure to provide interim and final reports to the Foundation may negatively impact your institution's ability to apply for future EMF awards. The EMF will maintain the copyright of all such reports. Progress reports must include an accounting report using Generally Accepted Accounting Procedures showing the distribution of funds with a signature from an institutional official (e.g., accountant, grants manager, administrator from the Office of Sponsored Research). The EMF reserves the right to withhold release of interim funds if >25% of the previous cycle remains unspent. The EMF allows up to 25% of funds to be carried over from one cycle to the next.

## **INSTITUTIONAL SUPPORT**

The Mentor assumes responsibility for conducting the research projects and supervising the work and advanced education of the EMF Research Fellow and associate investigators. The applicant and Mentor must demonstrate that access to a suitable caseload or patient population will be available for study during the funding period if a clinical research project is proposed. If a basic science or nonclinical project is proposed, the application must show that adequate and appropriately equipped laboratory space will be available during the funding period. **Research involving animals or human subjects must be approved by the institutional review board (IRB), or its equivalent, and a copy of the approval or pending approval sent with this application. IRB approval must be documented prior to dispensation of EMF funds.** The Mentor must demonstrate that the proposed projects are funded, designate a funding source, and demonstrate adequacy of the budgetary allocations for the funding period of the EMF Fellow.

## **EFFORT OF THE EMF RESEARCH FELLOW**

If all support of the EMF Research Fellow is provided by the Foundation, the EMF assumes 100% of the Fellow's effort will be directed toward emergency medicine research and pursuit of advanced training, preferably a degree (MS, PhD, etc). If the Mentor or the Mentor's institution chooses to provide supplemental salary support, the Fellow's percent of effort toward non-research endeavors will be proportional to the Mentor's or institution's support. No more than 25% of the designated Fellow's work week will be dedicated to endeavors unrelated to

fellowship activities.

### **GRANTEE WORKSHOP**

Grant recipients will be expected to attend a grantee workshop. The workshop is designed to bring together EMF grant recipients to present their progress and discuss any problems they may be facing. Senior researchers and faculty will be available to help solve problems that are potentially bogging down research projects, manage staff, and balance life. Travel expenses will be reimbursed by the Emergency Medicine Foundation.

### **RESEARCH FORUM**

Awardees are required to present their work at the American College of Emergency Physicians Scientific Assembly/Research Forum immediately following the completion of the second award year (June 30 – Year 2) as a poster presentation. Funds cannot be requested to cover the travel cost to attend the Research Forum, although the Scientific Assembly/Research Forum registration fee is waived for the presenter.

### **POST-FELLOWSHIP SURVEYS**

EMF Research Fellows will be surveyed periodically following completion of the fellowship regarding career paths, subsequent grants/contracts obtained, and publications. Fellows will be expected to respond to these surveys as the Foundation will rely on such information to support continuation of the Research Fellowship program.

## EMF RESEARCH FELLOWSHIP GRANT APPLICATION INSTRUCTIONS

Submission in electronic format is required. No paper copies please. Please fill out the detailed questionnaire about your grant application on the link on our EMF grant page. Be prepared to submit information about your project including where the name and address of your institution, detailed information about where the check will be sent, and names of your mentor, fiscal officer, etc. Once the “questionnaire” is completed, you will need to press submit then you will be guided to the next page where you can upload your application in a PDF format. Please note, the completed file cannot be larger than 10MB. **INCOMPLETE PROPOSALS OR PROPOSALS RECEIVED AFTER THE DEADLINE DATE INDICATED UNDER GENERAL INFORMATION WILL NOT BE CONSIDERED.**

Historically, getting the signatures on the application has been the main delay in meeting the grant deadline due to sick leave, vacations, business travel, etc. We suggest that you start getting the signatures as soon as possible so you do not miss the grant deadline. Once the deadline passes, we cannot accept the application.

Use English only and avoid jargon and unusual abbreviations. For terms not universally known, spell out the term the first time it is used with the appropriate abbreviation in parentheses; the abbreviation may be used thereafter. Type the application, single-spaced, and stay within the margin limitations indicated on the forms and continuation pages. The type must be clear and readily legible, no smaller than 15 characters per inch. (If in doubt, use 12 pt. size font.) Finally, there must be no more than six lines of text within a vertical inch. Use black type; do **not** use photo-reduction.

Do **not** submit an incomplete application. **An application will be considered incomplete if it is illegible, if it fails to follow instructions, or if the material presented is insufficient to permit an adequate review.** Unless specifically required by these instructions (e.g. human subjects certification, vertebrate animals verification) do **not** send supplementary material.

The application is to be submitted using the enclosed forms. Number the pages consecutively at the bottom throughout the application. Do not use suffixes such as 5a, 5b. Type the name of the Mentor at the top of each printed page. **AN APPLICATION WILL NOT BE CONSIDERED IF PAGE LIMITATIONS ARE NOT OBSERVED.**

The application consists of the following sections:

**1. INFORMATION PAGE**

Name the **one** person responsible to the applicant organization for the scientific and technical direction of the project. Choose a title that is descriptive and specifically appropriate, rather than general. List the Mentor and any associate investigators.

**2. ABSTRACT**

Brief summary of educational program and research proposal. Include coursework (or degree) to be completed and rationale, research hypothesis, specific aims, and significance.

**3. TABLE OF CONTENTS**

**4. INTRODUCTION TO REVISED APPLICATION, if applicable. (limit 2 pages)**

EMF will consider revised proposals, and two additional pages are provided to introduce reviewers to the revised proposal. Key things to keep in mind when submitting a revised grant:

- a. The introduction to the revision should provide a concise summary of reviewers' comments from the previous application and should, point-by-point, discuss how the revised application has addressed these concerns.
- b. Revised applications are not reviewed outside of the normal review process. Such applications may be more competitive than first-time submissions, but not necessarily so.
- c. Revised applications are reviewed as new science. Revised applications will not automatically be considered better applications within the review process.
- d. In the event of a resubmission, the committee will attempt to return applications to their original reviewers when possible. However, regular turn-over of the committee membership prevents the SRC from guaranteeing that a grant will be reviewed by the same individuals reviewing the original application.

**5. EDUCATIONAL PROGRAM** (limit 2 pages)

- a. Describe all coursework and, if applicable, the degree program to be pursued.
- b. List all regularly scheduled seminars and mentor meetings
- c. Indicate the annual tuition costs

**6. RESEARCH PROPOSAL** (limit 12 pages)

Use NIH form Continuation Format Page available on the internet at

[www.grants.nih.gov/grants/funding/phs398/phs398.html#](http://www.grants.nih.gov/grants/funding/phs398/phs398.html#)

Please use the following subheadings:

Specific Aims

- State concisely the goals of the proposed research and summarize the expected outcome(s), including the impact that the results of the proposed research will exert on the research field(s) involved.
- List succinctly the specific objectives of the research proposed, e.g., to test a stated hypothesis, create a novel design, solve a specific problem, challenge an existing paradigm or clinical practice, address a critical barrier to progress in the field, or develop new technology.
- Specific Aims are limited to one page.

Significance

- Explain the importance of the problem or critical barrier to progress in the field that the proposed project addresses.
- Explain how the proposed project will improve scientific knowledge, technical capability, and/or clinical practice in one or more broad fields.
- Describe how the concepts, methods, technologies, treatments, services, or preventative interventions that drive this field will be changed if the proposed aims are achieved.

Innovation

- Explain how the application challenges and seeks to shift current research or clinical practice paradigms.
- Describe any novel theoretical concepts, approaches or methodologies, instrumentation or interventions to be developed or used, and any advantage over existing methodologies, instrumentation, or interventions.
- Explain any refinements, improvements, or new applications of theoretical concepts, approaches or methodologies, instrumentation, or interventions.

Approach

- Describe the overall strategy, methodology, and analyses to be used to accomplish the specific aims of the project.
- Discuss potential problems, alternative strategies, and benchmarks for success anticipated to achieve the aims.
- If the project is in the early stages of development, describe any strategy to establish feasibility, and address the management of any high risk aspects of the proposed work.

- Preliminary Studies. Include information on Preliminary Studies. Discuss the PD/PI's preliminary studies, data, and or experience pertinent to this application. Preliminary data can be an essential part of a research grant application and help to establish the likelihood of success of the proposed project.

**7. DESCRIPTION OF THE FELLOWSHIP YEAR(S)** (limit: 6 pages)

Use the NIH form Continuation Format Page

[www.grants.nih.gov/grants/funding/phs398/phs398.html#](http://www.grants.nih.gov/grants/funding/phs398/phs398.html#)

Describe how the fellowship year will be structured. Outline major goals and objectives and indicate how they will be achieved. At a minimum, address how formal instruction in statistical analysis, research design, scientific writing, and grant writing skills will be accomplished. Include details of clinical duties, and relative commitments to clinical care, research, and class work. Indicate how the Mentor will monitor the fellow's progress.

**8. PERSONAL STATEMENT** (limit 1 page)

Use the NIH form Continuation Format Page

[www.grants.nih.gov/grants/funding/phs398/phs398.html#](http://www.grants.nih.gov/grants/funding/phs398/phs398.html#)

The applicant should compose and submit a personal statement that addresses:

- the applicant's interest in the topic and this project
- the applicant's perception of his/her role in the project
- any additional pertinent experience or interests the applicant wishes the committee to consider

**9. ROLE OF PARTICIPANTS** (limit 1 page)

Use the NIH form Continuation Format Page

[www.grants.nih.gov/grants/funding/phs398/phs398.html#](http://www.grants.nih.gov/grants/funding/phs398/phs398.html#)

List the Mentor and each associate investigator and consultant. Include a brief description of how and to what extent each will be involved in the proposed project. Describe how and to what extent the EMF Research Fellow will be involved on the projects.

**10. BIOGRAPHICAL SKETCHES**

Use the NIH Biographical Sketch Format Page available on the internet at

[www.grants.nih.gov/grants/funding/phs398/phs398.html#](http://www.grants.nih.gov/grants/funding/phs398/phs398.html#)

Information is requested for the applicant, Mentor and any associate investigators who will be involved with the projects. The new 4 page NIH format has been adopted. Description of extramurally funded projects ongoing or completed in the past 3 years should include title, funding source, specific aims, overall goals and role/responsibilities of individual on project.

**10. RESOURCES AND ENVIRONMENT**

Use the NIH Resources format Page available on the internet at

[www.grants.nih.gov/grants/funding/phs398/phs398.html#](http://www.grants.nih.gov/grants/funding/phs398/phs398.html#)

Describe the research facilities (laboratory space, clinical population, etc.) available for fellowship training. If computer access or statistical support is available, it should be described in this section.

**11. BUDGET**

Use the NIH Form Detailed Budget for Initial Budget Period available on the internet at

[www.grants.nih.gov/grants/funding/phs398/phs398.html#](http://www.grants.nih.gov/grants/funding/phs398/phs398.html#)

Indicate how the money will be spent. Justify all major expenditures.

## 12. OTHER SUPPORT

Use the NIH form Continuation Format Page available on the internet at [www.grants.nih.gov/grants/funding/phs398/phs398.html#](http://www.grants.nih.gov/grants/funding/phs398/phs398.html#)

List all current and pending intramural and extramural research funding for the applicant, Mentor and co-investigators. For each item indicate the grant identification number, grant type, PI, funding source, annual direct costs, funding period, percent effort, grant title, and brief description of project. For all items indicate whether there is any scientific or budgetary overlap with the current proposal.

## 13. ETHICS

Use the NIH form Continuation Format Page (no page limit) available on the internet at [www.grants.nih.gov/grants/funding/phs398/phs398.html#](http://www.grants.nih.gov/grants/funding/phs398/phs398.html#)

**Human subjects.** For all research involving human subjects, a part of the peer review process will include careful consideration of protections from research risks, as well as the appropriate inclusion of women, minorities, and children. The EMF Scientific Review Committee (SRC) will assess the adequacy of safeguards of the rights and welfare of research participants, and the appropriate inclusion of women, minorities, and children, based on the information in the application. This evaluation will be factored into the overall score. The information on the protection of human subjects that you are required to provide in this section is identical to information that you will be required to provide for IRB at your own institution and are required by most Federal agencies. This section must address the following items. These can be copied and pasted directly into your application.

The applicant should include specific measures on how protected health information (as defined by the Human Health Services) will be handled in accordance with the Privacy Rule of the Health Insurance Portability Accountability Act (HIPAA)."

### 1. RISKS TO THE SUBJECTS

#### a. Human Subjects Involvement and Characteristics

Describe the proposed involvement of human subjects in the work outlined in the Research Design and Methods section. Describe the characteristics of the subject population, including their anticipated number, age range, and health status. Identify the criteria for inclusion or exclusion of any subpopulation. Explain the rationale for the involvement of special classes of subjects, such as fetuses, neonates, pregnant women, children, prisoners, institutionalized individuals, or others who may be considered vulnerable populations. Note that 'prisoners' includes all subjects involuntarily incarcerated (for example, in detention centers) as well as subjects who become incarcerated after the study begins. List any collaborating sites where human subjects research will be performed, and describe the role of those sites in performing the proposed research.

#### b. Sources of Materials

Describe the research material obtained from living human subjects in the form of specimens, records, or data.

Describe any data that will be recorded on the human subjects involved in the project.

Describe the linkages to subjects, and indicate who will have access to subject identities.

Provide information about how the specimens, records, or data are collected and whether material or data will be collected specifically for your proposed research project.

c. Potential Risks

Describe the potential risks to subjects (physical, psychological, social, legal, or other), and assess their likelihood and seriousness to the subjects.

Where appropriate, describe alternative treatments and procedures, including the risks and benefits of the alternative treatments and procedures to participants in the proposed research.

**2. ADEQUACY OF PROTECTION AGAINST RISKS**

a. Recruitment and Informed Consent

Describe plans for the recruitment of subjects (where appropriate) and the process for obtaining informed consent. If the proposed studies will include children, describe the process for meeting requirements for parental permission and child assent.

Include a description of the circumstances under which consent will be sought and obtained, who will seek it, the nature of the information to be provided to prospective subjects, and the method of documenting consent. Informed consent document(s) need not be submitted to the PHS agencies unless requested.

b. Protection Against Risk

Describe planned procedures for protecting against or minimizing potential risks, including risks to confidentiality, and assess their likely effectiveness. Where appropriate, discuss plans for ensuring necessary medical or professional intervention in the event of adverse effects to the subjects. Studies that involve clinical trials (biomedical and behavioral intervention studies) must include a description of the plan for data and safety monitoring of the research and adverse event reporting to ensure the safety of subjects.

**3. POTENTIAL BENEFITS OF THE PROPOSED RESEARCH TO THE SUBJECTS AND OTHERS**

Discuss the potential benefits of the research to the subjects and others.

Discuss why the risks to subjects are reasonable in relation to the anticipated benefits to subjects and others.

**4. IMPORTANCE OF THE KNOWLEDGE TO BE GAINED**

Discuss the importance of the knowledge gained or to be gained as a result of the proposed research.

Discuss why the risks to subjects are reasonable in relation to the importance of the knowledge that reasonably may be expected to result.

**5. DATA AND SAFETY MONITORING PLAN (if applicable)**

If your research includes a clinical trial, create a heading entitled "Data and Safety Monitoring Plan."

Provide a general description of a monitoring plan that you plan to establish as the overall framework for data and safety monitoring.

Vertebrate Animals. For all applications involving vertebrate animals, the applicant must address the following five items. These five points may be copied and pasted directly into the application.

1. Provide a detailed description of the proposed use of the animals in the work outlined in the Research Design and Methods section. Identify the species, strains, ages, sex, and numbers of animals to be used in the proposed work.

2. Justify the use of animals, the choice of species, and the numbers to be used. If animals are in short supply, costly, or to be used in large numbers, provide an additional rationale for their selection and numbers.
3. Provide information on the veterinary care of the animals involved including the name of the supervising veterinarian. Include information from the Association for Assessment and Accreditation of Laboratory Animal Care International: the name of the accredited parent organization (e.g., University of X) and the certificate number and date of last inspection.
4. Describe the procedures for ensuring that discomfort, distress, pain, and injury will be limited to that which is unavoidable in the conduct of scientifically sound research. Describe the use of analgesic, anesthetic, and tranquilizing drugs and/or comfortable restraining devices, where appropriate, to minimize discomfort, distress, pain, and injury.
5. Describe any method of euthanasia to be used and the reasons for its selection. State whether this method is consistent with the recommendations of the Panel on Euthanasia of the American Veterinary Medical Association. If not, present a justification for not following the recommendations

#### 14. LITERATURE CITED

#### 15. APPENDIX

Include letters of support from the department chairs, and associate investigators (required). No page numbering is necessary for Appendix. The appendix can include

- Application for coursework or degree program at an accredited graduate school
- Up to 5 publications, manuscripts (*accepted* for publication), abstracts, patents, or other printed materials directly relevant to this project. *Do not include manuscripts submitted for publication.*
- Publications in press: Include only a publication list with a link to the publicly available on-line journal article or the NIH PubMed Central (PMC) submission identification number. Do not include the entire article.
- Manuscripts accepted for publication but not yet published: The entire article should be submitted and may be stapled.
- Manuscripts published but an online journal link is not available: The entire article should be submitted and may be stapled.
- Surveys, questionnaires, data collection instruments, clinical protocols, and informed consent documents. These may be stapled as sets.
- Original glossy photographs or color images of gels, micrographs, etc., provided that a photocopy (may be reduced in size) is also included within the 12-page limit of *Items a-d* of the research plan. *No photographs or color images may be included in the Appendix that are not also represented within the Research Plan.*

Do not use appendix to circumvent page limitations for research plans. Do not include experimental methods, protocols or figures that should be incorporated within the research project description.

**INTRODUCTION TO REVISED APPLICATION**, if applicable. (Limit 2 pages)

EMF will consider revised proposals, and two additional pages are provided to introduce reviewers to the revised proposal. Key things to keep in mind when submitting a revised grant:

- a. The introduction to the revision should provide a concise summary of reviewers' comments from the previous application and should, point-by-point, discuss how the revised application has addressed these concerns.
- b. Revised applications are not reviewed outside of the normal review process. Such applications may be more competitive than first-time submissions, but not necessarily so.
- c. Revised applications are reviewed as new science. Revised applications will not automatically be considered better applications within the review process.
- d. In the event of a resubmission, the committee attempts to return applications to their original reviewers. However, regular turn-over of the committee membership prevents the SRS from guaranteeing that a grant will be reviewed by the same individuals who reviewed the original application.

MAJOR EQUIPMENT: List the most important equipment items already available for this project, noting the location and pertinent capabilities of each.

**STATEMENT OF CONDITIONS GOVERNING THE  
EMERGENCY MEDICINE FOUNDATION GRANT**

It is understood that any Emergency Medicine Foundation Research Grant approved by the Emergency Medicine Foundation will be made with the following conditions:

1. Institutional overhead is not allowed.
2. The principal investigator's institution is associated or organized for humanitarian purposes and is not a profit making organization.
3. All reports of work achieved with this grant will acknowledge the support of the Emergency Medicine Foundation and his or her co-sponsor, if applicable.
4. Any discovery that arises from work supported in part by the Emergency Medicine Foundation will be submitted for publication. Two copies of each publication will be furnished to the Emergency Medicine Foundation.
5. Independent progress reports by the applicant will be submitted to the Emergency Medicine Foundation mid-project, and within thirty days of completion of the funding period. Additional reports may be required. The Emergency Medicine Foundation will maintain the copyright of all such reports.
6. Participation in Emergency Medicine Foundation recognition reception during the American College of Emergency Physicians Scientific Assembly is required. Grant money may not be used for travel to this event.
7. Participation in the Emergency Medicine Foundation Grantee Workshop is required. Grant funds may not be used for travel. The Emergency Medicine Foundation will reimburse travel expenses.
8. Participation in Research Forum to give a poster and lightning oral presentation is required. This event takes place at the end of your project. Research Forum is held each year during the American College of Emergency Physicians Scientific Assembly. Grant money may not be used for travel.
9. If all requirements are met, funding will begin on July 1<sup>st</sup>. The Emergency Medicine Foundation reserves the right to terminate payments under this grant at its sole discretion.
10. If the named principal investigator leaves the institution or terminates research in the designated field, all remaining funds revert to the Emergency Medicine Foundation. If unused funds exist at the completion of the project, all remaining funds revert to the Emergency Medicine Foundation.
11. Patent rights will conform to institutional standards. If none exist, the Emergency Medicine Foundation reserves the right to protect such interests.
12. No research proposal will be funded unless the principal investigator and the Fiscal Officer of the sponsoring institution affirm:

- a. That the investigation(s) proposed in this application are endorsed by the Animal and/or Human Subjects Committee or other designated body of the preceptor's institution, and
- b. That any research involving human subjects conforms with the principles of the Helsinki Code of the World Medical Association, and
- c. Research involving animals or human subjects must be approved by the institutional review board (IRB), or its equivalent, and a copy of the approval or pending approval sent with this application. IRB approval must be documented prior to dispensation of Emergency Medicine Foundation funds.
- d. That research involving vertebrate animals will conform with the "Guiding Principles in the Care and Use of Animals" as approved by the Council of the American Physiological Society.
- e. Research involving vertebrate animals must have approval from the institutional Animal Care and Use Committee.
