

Case Title

Do not include your name or institution (judging will be blind).

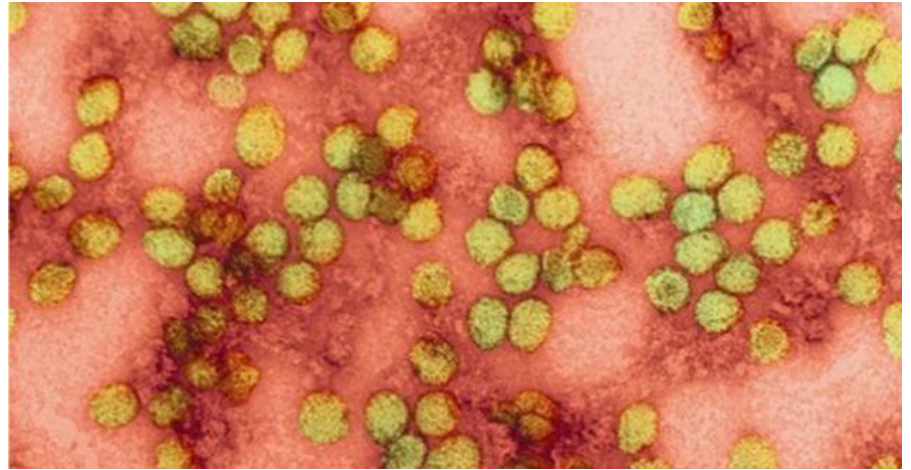

Do not include the case topic or diagnosis. The title should be vague while also captivating enough to draw someone's attention and keep them interested.

Slides 2-10 Title of Slide

- These slides should include the body of your case presentation and one audience response (ARS) question slide.
- When including images, make sure they are **high quality** and **very clear**.
- DO NOT include disclosure, acknowledgement and/or reference slides. These will be added only if your case is accepted.
- Presentations should be set to Widescreen (16:9).
- Keep your words to a minimum. If your case is selected for presentation, you will be allotted exactly 10 minutes to present (including the ARS question(s) and audience response time).
- Text fonts should not be less than 18 pts. A well-sized font is between 22-24 pts.
- DO NOT include disclosure, acknowledgement and/or reference slides. These will be added only if your case is accepted.

Image Examples

When including images as part of your case, they should be **high quality** and **very clear**.

Introduction

Briefly introduce your case, but do not include the final diagnosis.

Case Presentation

Present data about the patient. Information may include:

- Description of why the patient sought medical help.
- Observations of the medical exam.
- Description and results of any specialized tests that were performed.

Case Investigation/Data

Include any test result data.

Test	Level (range)
Hb	14.3 (14.0-17.4 g/dL)
WBC	9.0 (4-11 x 10 ³ /mm ³)
Platelets	188 (150-400 x 10 ³ /mm ³)
CRP	5 (<5 mg/L)
ESR	5 (<10 mm/hr)

Case Management

Document the management and outcome of the case by explaining the treatment plan for the patient. Details may include:

- Length of treatment
- Frequency of treatment
- Type of treatment and method
- Measurement of progress or lack of progress
- How and why the treatment ended

Audience Response Slide

Prepare one multiple choice question for your case, limited to 3-5 answer choices. This question will be posed to the audience for live voting. Do not put any extra information on this slide. Example questions:

- *What would you do next?*
- *What is the diagnosis?*
- *Which of the following features helps distinguish the most likely cause of this patient's symptoms?*

Case Discussion

Report the final patient diagnosis, long-term outcome and any future research plans.

Summarize the lessons learned from the case and why they are significant for future treatments of similar cases.

Take Home Message: outline the primary educational points of your case study/diagnosis.
