

## **Call for Presentations**

### **2022 IECA Mountain States Conference & Expo**

The conference annually draws 150 - 175 attendees from around the Mountain States region and features three training tracks. This year's conference will focus on floods, fires and soil stabilization and other regional issues relevant to your job and area projects. We are currently seeking abstracts for case studies, workshops, technical papers and more to help attendees learn about real world industry solutions applicable to the area.

#### **Erosion and Sediment Control**

Managing Soil for Vegetative Establishment | Climate Change Impact on BMPs | Innovative BMPs/Research and Development | Silt Fence Materials, Design and Installation Innovations | Effective BMP Inspection Methods | Soil Stabilization | Fire Restoration and Remediation

#### **Stormwater Management**

Treating Whole Flow vs. First Flush in Compliance with Clean Water Act | Stream Monitoring TMDL Alternative Plans | BMP Long Term Operation and Maintenance Strategies | Stormwater BMP Remediation/Retrofit Applications | The Future of Stormwater Conveyance | Watershed Stewards Programs | Flood Management and Recovery

#### **Wetland, Stream Bank & Shoreline Restoration**

Working in Waterways | Hydromodification Modeling, Control, and Mitigation | Streambank Stabilization | Constructed Wetlands for Stormwater Treatment | Revegetation Options and Management

#### **MS4 Management**

MS4 Program Adaptive Management/Goals | Industrial Stormwater Management | Training & Enforcement | Enforcement of GI Practices Long Term | Stormwater Monitoring: Illicit Discharge, Detection and Elimination

#### **Industry Trends**

Response to Extreme Weather | Government Standards and Compliance | Flood Control
