

ACVR 2022 Annual Scientific Conference Proceedings

Author Release Form

Thank you for your abstract submission to the 2022 ACVR Annual Scientific Conference Proceedings. In the event your abstract is accepted, we hereby request permission to include your abstract in the ACVR 2022 Annual Scientific Conference Proceedings. Your abstract may appear in any or all the following formats: print publication, CD-ROM, and on the American College of Veterinary Radiology Internet website (<http://www.acvr.org/>) and the secure, members-only Veterinary Information Network site (<http://www.vin.com/Members>).

We request perpetual rights to use the work you submit in the formats listed above. The copyright and right to reuse the content (including artwork) remains with you. This permission includes all artwork submitted for scanning and all digital artwork, either sent separately or embedded in the digital file of the manuscript or any other digital file. If I am a resident and chosen to present during the oral or poster competition, I grant permission to ACVR to video record my presentation. In addition, you are releasing the abstract for publication in *Veterinary Radiology & Ultrasound* after the ACVR annual conference (Scientific Presentations and Scientific Exhibits only).

We require the signature of the copyright holder to the work, including the artwork (such as illustrations, photos, etc.). For the abstract, the signature of all authors is mandatory. If the copyright has been signed over to another party such as a publisher, we need their signature as well. For any artwork submitted with the paper, if the copyright is not held by any of the authors of the paper, please forward a list of this artwork and include the signature of the person or persons who do hold copyright to it using this acvr@pamedsoc.org.

Please electronically sign below to indicate your agreement to our use of this material as specified in this form.

I hereby grant permission for use of this material as specified above.
