Operative and Procedural Videos in Sarcoma Management

Introducing a new session during the 2023 CTOS Annual Meeting!
Operative and Procedural Videos in Sarcoma Management
Wednesday, November 1 from 4:00pm to 5:00pm
Co-Chairs: William Tseng (Duarte) and Sophie Mottard (Montreal)

This session will highlight techniques and technical considerations in the management of patients with sarcoma. Presentations will be in video format, limited to 5 minutes each with live in-person narration, followed by a brief period of questions and discussion. Videos may feature any of the following:

1) Key considerations in standard operations
2) Novel or nonstandard operations
3) Nonoperative procedures, including interventional and palliative intent

The goal for each video is to visually showcase an operation or procedure that audience members can apply in their practice or that can be used to stimulate larger-scale, collaborative study - all to improve sarcoma patient care. We welcome submissions by junior and senior faculty, as well as trainees in any discipline including but not limited to Surgical Oncology, Orthopedic Oncology, and Interventional Radiology.

If accepted, presenters will present the video in person at the meeting. The presenter will be responsible for obtaining any necessary patient consent. Presentations should be checked to ensure any potential patient identifiers are removed.

The deadline to submit an abstract for this session is **August 1, 2023**.

Please send any questions to ctos@ctos.org.
