

Call for Presentations Submission Guidelines

2027 UTC Telecom & Technology Conference

Submission deadline: 11:59 pm (ET), September 15, 2026

Acceptance notification: Early to Mid-February 2027

To submit your abstract

1. Login or Create your account.
2. Select “Click here to begin a new abstract.”

Required sections of the online submission process

1. Title

- It must be limited to 75 characters, including spaces.
- This short title will be used in conference-related material. This title should reflect the content of the abstract. Limited use of commonly accepted abbreviations or acronyms is acceptable. Use title case (the first letter of each word is capitalized, except for certain small words, such as articles and short prepositions).

2. Speaker information

- The speaker’s information generates the list of names and affiliations in the published abstracts for T&T.
- Include all speakers. You may add as many speakers as necessary. You must provide complete information for each field: first and last names, company, city, state, and country, and email address.
- Speaker names, last name, and first name will be listed.

3. Company field

- Use the “Organization” field to list the company name. If there is no company, enter ‘N/A’ in the field.
- Be sure that the company name is consistent for each speaker. Do not spell out the organization for one speaker; abbreviate it for the second speaker.
- Use the arrows/numbers to order the speakers, including the presenting speaker, in the exact position you wish them to appear.

4. Role

- Select your role type, i.e., Submitter only or Speaker

5. Presenter type

- Select the presenter type, e.g., Utility member, Utility non-member, Vendor member, Vendor non-member, or Industry partner.

6. Biography

- All speakers must provide a short biography of 200 words, including spaces.

7. Topic

- Select the topic for the main subject matter area.
- Then select the sub-topic for the subject matter area.
 - These are only suggestions, and you are not required to fit specifically into any of these subject matter areas. The Program Committee will review all submitted abstracts and develop the subject matter and program based on the merit of the submissions.
- If you selected 'Other,' please indicate or type n/a if that does not apply.

8. Abstract description

- Define the problem you are addressing clearly and concisely (**BONUS: Include key words or phrases from the CFP**). Captivate readers with your description in terms of the problem by providing interesting or controversial perspectives on your topic. Explaining what your presentation will cover in regard to the topic and problem presented. Matching your proposal to the conference theme/CFP topics, and ensuring the scope of your presentation fits the allotted presentation time.
- Single-spaced and cannot exceed 250 words. Do not include the title, authors' names, or affiliations. Do not underline, italicize, capitalize, or bold for emphasis within the text.
- Your proposal will not be reviewed if you do not provide a minimum of 150 words.

9. Utility speaker

- All sessions will require a speaker from a Utility. Please indicate which Utility you plan to invite. (If you need clarification, please give us insight into who you are thinking of and let us know it is pending.)

10. Terms and Conditions

- Please read through the terms and conditions. Check the box to indicate that you agree and sign your name on the line provided. Then, select 'Submit Agreement.'

11. Save and submit your proposal!

12. To submit another proposal, repeat the process.

Speaker notification

All speakers will be notified via email whether their abstracts are accepted or declined in early to mid-February 2027.

All speakers must register for the Telecom and Technology Conference and, if selected, pay the appropriate registration fee.

If you have any questions, please contact Cynthia Perez at cynthia.perez@utc.org.
